

# CONSENT TO PARTICIPATE IN Community Education Program

**B.F. Environmental Consultants**  
**Mr. Brian Oram, PG**  
**15 Hillcrest Drive**  
**Dallas, PA 18612**

Mr. Brian Oram has been conducting Community Outreach Programs and conducting water quality analysis and education for the past 20 years. Even though our groundwater resources are one of our most important assets, there is limited data on the quality and quantity of our regional groundwater.

Name: \_\_\_\_\_

Address: \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_ Email \_\_\_\_\_

Phone: \_\_\_\_\_ Lab or Sample ID: \_\_\_\_\_

Note: A copy of your authorization will be returned to you by mail

With this consent form, you have the following options (please sign accordingly):

1. Participate in the community education program. With this program, Mr. Brian Oram will review your data, prepare a summary report for only your review, and you will permit Mr. Brian Oram to use the data for education and outreach programs only. **The data will not be entered into the regional database.**

**Consent to Participate** \_\_\_\_\_

2. Mr. Oram is working with two professors from Wilkes University to help establishing a regional water quality database and we want to add the data from your recent certified water quality baseline analysis to the database. The purpose of the database is twofold. First, we will use it to help understand the current and future groundwater and surface water quality for the region and conduct education and outreach. Second, the database will be used to generate or update regional water quality educational materials and track change in groundwater quality. The database is for applied research and education and will not be sold. The database is managed by Dr. Sid Halsor, Professional Geologist (PG), Dr. Brian Redmond, PG, and Mr. Brian Oram, PG in the Environmental Engineering and Earth Sciences Department at Wilkes University.

Participate in the education program and release the "data", excluding your name, address, and contact information to the "Citizens Groundwater and Surfacewater Database". To protect your privacy the research database file will only included the **testing results, zip code, general information on well or water source, and the latitude and longitude of the sampling site.**

**Consent to Participate** \_\_\_\_\_

Questions – Please do not hesitate to call Mr. Brian Oram at (570) 335-1947, [bfenviro@ptd.net](mailto:bfenviro@ptd.net) or visit <http://www.bfenvironmental.com>

Thank You for Your Consideration!

Mr. Brian Oram, PG
